

# INTRODUCING **Nikec HUB**

A powerful extranet and collaboration  
platform from Nikec Solutions

# NiKec Hub

**The powerful extranet for all your firm's collaboration, communication and document security needs**

NiKec Hub is an extranet that provides firms with a secure and efficient way of managing information, while enhancing communications and collaboration with colleagues and clients. It integrates seamlessly with your document management system allowing users to create their own extranet in a few quick steps. It also integrates with many practice management systems enabling firms to provide up-to-date management information to their clients all from within a single, powerful portal.

# #Collaborate

Nikec Hub provides a single, centralised area for team members and clients to store, share, edit and view matter or project related documents and folders.

It provides a strong platform where ideas can be exchanged and where documents can be accessed and reviewed in an efficient and streamlined manner. Ultimately it allows teams to stay focused throughout the entirety of the project or matter. Document updates can be tracked and tasks can be assigned to specific individuals, enhancing accountability and productivity.

# #Share

Nikec Hub allows users to share projects, matter, financial management information and large files or entire folders securely, directly from their document management system.

# #Communicate

Nikec Hub allows users to exchange information, resources, comments and ideas with colleagues, clients, counsel and suppliers from within a centralised area. It reduces miscommunications through disparate messages being sent by email or phone ensuring that communications remain seamless.

At the same time providing clients with up-to-date management information about their matter in the same document sharing portal, enhances your client's experience.

# #Knowledge

Nikec Hub ensures that all essential knowledge about a matter or project is captured centrally for teams and clients to tap into and access at all times. This helps leverage a firm's existing knowledge and expertise to provide the best possible service to clients.

# #Integrate

Nikec Hub seamlessly integrates with your document management system to allow for a pain free creation of hubs and easy document sending.

It also integrates with your finance system allowing you to give up-to-date management information to your clients. Our open API gives the ability for any system to connect to Nikec Hub.

# #Security

Nikec Hub is available in the cloud or on premise to suit a firm's security requirements. Encryption technology is used to protect data when stored on the server or during transfer. Granular permission settings allows for greater security and document control throughout your firm. The reporting function also allows firms to track documents for auditing purposes and manage any compliance risks.

# #Personalise

Nikec Hub offers the most advanced corporate branding capabilities to each individual Hub, including customised templates to personalise the way the platform looks and feels, using colours, logo, images and 'widget' placement.

# Overall Nikec Hub

## **Saves on in-house development time & costs**

Nikec Hub alleviates the need for IT teams to develop custom built extranets in-house (e.g. SharePoint), saving considerable development time and maintenance costs for firms overall.

# Overall Nikec Hub

## **Empowers users**

Nikec Hub empowers users to create their own extranets directly from their DMS or web client. With minimal IT involvement it makes processes more efficient and effective all around.

# Overall Nikec Hub

## **Beneficial for clients**

This easy-to-use platform dramatically lowers the barriers for client interaction. It allows them to be in control of their documents at all times and stay up-to-date on all financial information and other important documents.
